

SOIT Business Solutions: Comprehensive Cyber Security Services

SOIT Business Solutions offers Cyber Security Services designed for resilience. Our solutions include:

- Incident Response
- Threat Intelligence Alerts
- Threat Hunting
- Vulnerability Management
- Penetration testing
- Phishing Services

All this and more are managed from our Security Operation Centre following best practices and a strict change management process.

Our Services are highlighted below:

SOIT FireSecure:

Firewall Audit, Report & Remediation:

Unique consultancy service offering called “FireSecure” to ensure that Next-Gen Firewall / UTM devices are Audited, Reported and Secured by our highly skilled network security experts. FireSecure offers comprehensive auditing, detailed reporting, and consultancy-led remediation services.

SOIT SecurePlus:

Managed Cybersecurity Service:

SOIT fully manages security operations for you. Our Security Operations Centre (SOC) team uses most advanced Cyber security Platform to monitor for security events in your customer’s IT environment 24x7x365 and provides our partners with incident notification, remediation guidance, and reporting.

SOIT RapidMDR

Manage, Detect and Respond:

SOIT RapidMDR combines human intelligence, industry's best security processes, and technology to detect advanced targeted threats. SOIT's Global Security Operation Centre delivers 24x7 monitoring and notification, incident response and remediation service. Highly skilled Security Analyst investigates events generated by security solutions to identify the extent and impact of the attack with the help of Root Cause Analysis.

SOIT VAPTPro:

Vulnerability Assessment & Penetration Testing:

This product provides manual human intelligence driven VAPT service for network and web applications. This blended service uses a combination of state-of-the-art tools and skilled security analyst to perform security audits and penetration testing. It includes consultancy led remediations.

SOIT PhishNet:

Phishing as a Service:

SOIT PhishNet offers fully managed phishing simulator to conduct simulated phishing attacks to test organization's susceptibility to real Phishing attacks and increase employee's security awareness. Real world and custom template campaigns.

SOIT NetSecure

SOIT NetSecure:

We have designed a unique consultancy-led Network Security Auditing and Remediation service called "NetSecure" to ensure that key network elements such as Next-Gen Firewall / UTM, Switches, Routers, Wireless Controllers/Access Points, Web and Email Gateways are Audited, Reported and Secured by our highly skilled network security experts.

SOIT can improve your cyber security by providing organizational components and processes to ensure your cyber security risks are managed effectively.

Identify the risks you face

Implement security measures to reduce threats

Determine the root cause of the issue

With attacks happening every 39 seconds, you need a trusted cyber security partner who can ensure fast responses to attacks to help mitigate potential risks.
